

Greeting

Considering preservation of global environment, we have been earnestly managing to recycle disposed resources from pet bottles to ocean going ships since 1996. Based on our abundant experiences and remarkable achievements, we are continuing our maximum efforts and challenges as the specialists so that we could meet the social requirements which the very limited resources in the world should be used effectively.

Under the above circumstances, we shall thank you if you will give us your kind and continuous support as you did.

President Zhou Biao

2. Vessels repairing and remodeling

- Supporting vessels repairing and remodeling both in Japan and China
- Planning all business related used vessels, i.e. purchasing, remodeling (designing and supervising their construction) and securing their nationalities

Recycling business

1. Recycled plastics

- Paying special attention for preservation of global environment, we commenced the recycling business with industrial wasted resources in 1996. We built Sakura Recycle Center as our facility to carry out this business with wasted plastics and metals in Japan, while we also started the same business to produce the recycled pellets at our factory in China.
- Asahi Newspaper and TV Tokyo, the leading mass media in Japan, have reported our activities of recycling business as “Daybreak at Gais” with high evaluation in the Japanese market. Consequently our trading firms gradually increased and became more than 200 and handling items counted more than 30 kinds at present.
- Handling items
More than 30 kinds of Recycled plastics including PET, PE, PP, PA, POM, PMMA, ABS, PS, PC, etc.
- Sakura Recycle Center
Area –4,000 square meters
Facilities- well maintained as processing factory equipped with
 - 3 sets of large grinders
 - 4 sets of 100-150 tons pressed packing machines
 - large type trucks
 - loading and unloading platforms

2. Recycled scrapped metals

- In 1990s economy in China and Southeast Asian countries have remarkably developed. As they requested a huge amount of various kinds of materials, especially steel and nonferrous metals, the stock of such materials showed seriously short situation in the world market. As a result, their prices suddenly soared. In this connection, we have started the recycling business of such scrapped metals in order to meet our clients requirements in 1996.
- Handling items:
Mainly copper, aluminum and stainless steel, which are extracted from scrapped motors, air-conditioners, and domestic appliances, etc.

3. Production of Bricks from wasted lumbers

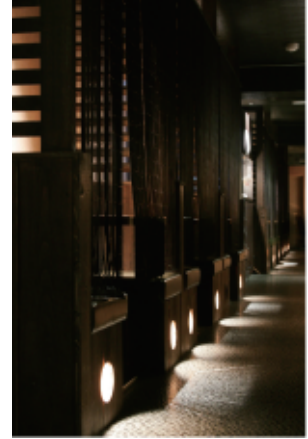

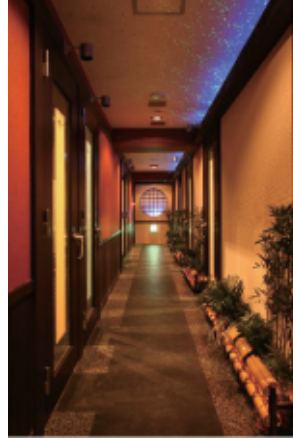

- We have recently developed to produce Bricks with wasted lumbers as a new part of our recycling business.

Restaurant Business

We have been extending, mainly in Tokyo, the chained restaurants named “Moon”. At all spaces in these restaurants our guests can enjoy their relaxed atmosphere, as they were built under our policy of “Peace”. We are serving the creative dishes given our whole hearts for the customers, and are very proud that they are highly evaluating our cuisine.

Other than the above dishes, we are also serving our Chinese foods, which you can image our home-cooked meals, at our chained Chinese restaurants.
